Courtyard Concept:

- Donor Wall
- Kiosk
- Seating

This master plan represents a vision for The Park at Flat Rock. It is based on our community values and a desire to provide a place of beauty for people to enjoy. This beauty is evident in the Park's tiniest seed and its longest vista. Preserving, protecting, enhancing, and sharing this natural beauty will improve the quality of life for all who seek it.

The purpose of this plan is to inspire and guide the orderly development of the Park. Features include open space, walking trails, picnic areas, and a playground. Proposed structures will provide attractive architectural elements as well as shelter and basic services. Our Park will offer opportunities for active and passive recreation, tranquil meditation, and a connection to our fascinating natural world and community.

The plants and wildlife in the Park are extensive and diverse. Environmental educational opportunities abound to study and teach about this magnificent natural world. Natural habitat will be protected to create a sanctuary for these creatures and to ensure they will remain for future generations to enjoy.

It is our vision that the interaction of people with nature will enrich their lives and serve to improve the health and wellness of the greater community. We envision a signature park, uniquely Flat Rock yet universal in appeal. Not an ordinary place, but an extraordinary one. A park that beckons, inspires, and comforts. A place that is loved, used by all ages, and preserved for generations to come.
